

Jason Torres

Level Designer, Technical Artist, & Game Programmer

jasontcascadework@gmail.com | [GitHub](#) | [Portfolio](#)

I am a seasoned game developer who specializes in level design and gameplay programming. I specialize in designing for player experience: in many situations, I've performed deep analysis of levels in-progress, and refactored them to better streamline the player flow. I also have a background in art and programming, which has been very useful for implementing visual effects and level gameplay elements
